

ATF IID

Automatic transmission fluid

DESCRIPTION	HARTOL ATF IID is a premium-graded red colored automatic transmission fluid, formulated with solvent-refined base oils and carefully selected additives to obtain the following properties:	
	<ul style="list-style-type: none">• High and stable viscosity index• Extremely low pour point• Outstanding oxidation stability• Effective protection against wear, corrosion and foaming• Optimized friction characteristics• Full compatibility with seals and non-ferrous metals.	
APPLICATION	This fluid is suitable for automatic gearboxes, power steering units, torque converters and other equipment, for which an ATF Dexron IID fluid is required.	
SPECIFICATIONS	<ul style="list-style-type: none">• Allison C4• Cat TO-2• DTFR 13C140• Ford Mercon/M2C138-CJ/166-H• GM Dexron IID	<ul style="list-style-type: none">• MAN 339 Typ Z1 / V1• MB 236.6 / 236.7• Voith 55.6335 (G607)• ZF TE-ML 09 / 11A / 14A
TYPICAL PROPERTIES	<ul style="list-style-type: none">• Density at 15 °C, kg/l• Viscosity 40 °C, mm²/s• Viscosity 100 °C, mm²/s• Viscosity Index• Flash Point COC, °C• Pour Point, °C	<ul style="list-style-type: none">0,85439,007,60168225-51
