

## BRAKE CLEANER

### Aerosol cleaner for brake

---

**DESCRIPTION** HARTOL Brake Cleaner is a high-performance degreaser with high pressure, designed for cleaning and washing the brake system, as well as metal parts and tools.

---

**APPLICATION** Complex lithium grease is engineered for enhanced durability, designed for friction elements operating under harsh conditions across various industries. In particular suited for lubrication of axle bearings in commercial trucks. The lubricant contains a special formula of additives that delivers exceptional anti-wear, lubricating, and anticorrosion properties. The grease is characterized by excellent adhesion to the lubricated surface and strong resistance to water washout. Additionally, the product demonstrates high mechanical stability and maintains its consistency throughout prolonged use.

- 
- PROPERTIES**
- High performance
  - Suitable for high pressure applications
  - Effectively removes impurities such as oil residues, greases, and tarnish
  - Quick evaporation
  - Safe for use on metal surfaces
  - Leaves no residue
