

## COPPER LUBRICANT SPRAY

### Lubricant spray

---

**DESCRIPTION** HARTOL Copper Lubricant Spray is a versatile assembly paste designed to lubricate parts exposed to extremely high temperatures. It forms a permanent protective layer against corrosion and abrasion, ensuring easy disassembly of treated components.

---

**APPLICATION** It is suitable for lubricating screws, nuts, threaded joints, ignition plugs, and other surfaces that require protection. Do not apply it to aluminum parts.

- 
- PROPERTIES**
- Multi-purpose application
  - Prevents seizing and galling
  - Protects against friction wear, corrosion, and high temperatures
  - Wide operating temperature range: -30°C to 1000°C
  - Easy to apply
  - Can be applied at various angles; equipped with a 360° valve
