

HARTOL GEAR EP 150

Gear oil

DESCRIPTION	HARTOL GEAR EP 150 is a high-grade industrial gear oil, based on mineral oil, under addition of lead-free EP additives to obtain the following properties: • a very good resistance towards high pressures and shock loads; • a good resistance against high temperatures; • good corrosion preventing properties; • an excellent prevention from wear; • a very good activity against foaming; • a low pour point.	
APPLICATION	HARTOL GEAR EP 150 can be used for the lubrication of almost any type of industrial gear box, even when exposed to heavy duty and shock loads.	
SPECIFICATIONS	• AGMA 9005-F16 (AS) • AIST (US Steel) 224 • David Brown S1.53.101 E • DIN 51517-3 CLP • ISO 12925-1 Type CKD	
TYPICAL PROPERTIES	• Density at 15 °C, kg/l • Viscosity 40 °C, mm²/s • Viscosity 100 °C, mm²/s • Viscosity Index • Flash Point COC, °C • Pour Point, °C	0,890 150,00 14,60 95 245 -21
