

MULTI GREASE EP 2

Lithium universal grease

DESCRIPTION HARTOL Multi Grease EP 2 is a multi-purpose lithium grease.

APPLICATION Multi-purpose lithium grease is designed for lubricating bearings, pins, and joints, and other components operating under harsh conditions - increased pressure and temperature, and irregular or heavy loads. The product can be used for lubricating highly loaded friction systems across a wide range of industrial applications, where a lubricant with high anti-seize properties is required. The grease offers excellent mechanical stability, provides anticorrosion protection even in the presence of water, and demonstrates good resistance to oxidation.

SPECIFICATIONS

- DIN 51502: KP2N-30
- ISO 6743/9: ISO L-XCDHB2

TYPICAL PROPERTIES	• Appearance	Homogenous and smooth
	• Color	Brown
	• NLGI Grade	2
	• Worked penetration, <i>1/10 mm</i>	28
	• Soap Type	Lithium
	• Dropping point, °C	218
	• Standard Test Method for Corrosiveness to Copper 24 hours at 100°C (degree of corrosion)	1
	• Base oil viscosity at 40°C	220
