HARTOL

Select R SAE 5W-30

Fuel economy synthetic engine oil

DESCRIPTION	 HARTOL Select R SAE 5W-30 is a fuel economy, synthetic engine oil, developed according to the most recent technology, based on specially selected synthetic base oils. By applying advanced additives, the exceptional performance of this low SAPS engine oil is accentuated: a lower fuel consumption; suitable for modern catalysts; low combustion ash building (low SAPS); a fast cold start; a safe lubrication film at high temperatures; a very good detergency and dispersion; a very strong protection against wear, corrosion and foaming. 	
APPLICATION	A fuel economy, specially composed synthetic engine oil, recommended for use in petrol and diesel engines, with or without turbocharging, in passenger cars and delivery vans. Due to its special composition this product can be applied in vehicles for which the Renault specification RN0720 is asked and are equipped with modern three-way catalysts and diesel particle filters. Due to its low SAPS content this engine oil contributes to the extension of the lifetime of particle filters for diesel engines. Warning : These oils have the lowest SAPS limits and may be unsuitable for use in some engines.
